Look Ahead
Plan future coursework and see where it will fill into the degree requirements.

To use Look Ahead:

1. Select **Look Ahead** from the sidebar menu.
2. Enter the course into the “Subject” and “Number” fields. The “Subject” must be a three-letter subject code (example: CHE), and the “Number” must contain the three-digit course number followed by any alpha character(s) included in the course number (example: 002A).
3. Select **Add Course** to add the course to the “Courses you are considering” field. Repeat this process to add additional courses. To remove a course that has been accidentally added to the “Courses you are considering” field, highlight the course you want to remove by clicking on it and select **Remove Course**.
4. Once you have added all your courses, select **Process New** to run the evaluation using the Look Ahead courses. A new audit generates and displays. The Look Ahead coursework displays in blue text as in-progress with a grade of PL (planned), as seen below. This tool gives you a projection of how future coursework will apply to your audit and graduation progress.

<table>
<thead>
<tr>
<th>Quantitative Literacy</th>
<th>CHE 002A</th>
<th>General Chemistry</th>
<th>PLAN (5)</th>
<th>Planned Term</th>
</tr>
</thead>
</table>

**Note:** Look Ahead courses factor into the credit totals, but it is important to note that the Look Ahead does not validate against repeat rules. Look Ahead applies repeated coursework in the Look Ahead evaluation and will display more units than the student would actually have after completing the repeat course.
